SUMMARY

Web Developer with hands-on experience building **web applications** using **React.js**, **Node.js**, and **MongoDB** through academic and personal projects. Strong foundation in **frontend development** and **REST API integration**.

EDUCATION

BSc. CSIT | Birendra Multiple Campus, TU | 2022 – 2026

Relevant Coursework: Web Development, Data Structures & Algorithms, Database Management Systems

PROJECTS

- [**SideJobs**](#) – **Full-Stack MERN Web App**
 - Built a full-stack platform connecting freelancers with clients using **React**, **Node.js**, **Express** and **MongoDB**
 - Implemented **user authentication**, **job posting** and application workflows
 - Designed **REST APIs** and handled **CRUD operations** for job and user data.
- [**Notes App**](#) – **MERN Stack Web App**
 - Developed a notes app with frontend and backend integration.
 - Implemented **create**, **read**, **update**, and **delete** (CRUD) functionality.
 - Practiced **API integration** and **client-server** communication
- [**Aakashvani**](#) – **Weather Web App**
 - Built a weather app using **public APIs** to display **real-time weather** data.
 - Used **asynchronous JavaScript** to fetch and render API responses.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3, Responsive Design
- **Backend:** Node.js, Express.js, RESTful APIs, MongoDB
- **Dev Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel
- **Concepts:** Component-based Architecture, State Management, API Integration, Client-Server Architecture

Achievements & Activities

- **3rd Place** - [**IS Hackathon**](#), IS Club, KUSOM
Developed “[**AdharCare**](#)” with **ReactJS** and **NodeJS** solving real-world health service access issues.
- **Member** - [**Birendra IT Club**](#), Birendra Multiple Campus, TU
Participated in **coding sessions** and tech **workshops**, collaborating with peers on small projects and skill-building activities.
